"Our strong results for Q4 2021 are the culmination of focused execution on our growth strategies. Over a year ago, we put in place significant changes in our go-to-market strategy to focus on large commercial and enterprise customers, who often struggle with their digital transformations," said Andrew Casey, CFO of WalkMe. "It is these customers who have cross organizational and multi-application business processes that benefit most from the WalkMe platform. This is exemplified by the ARR growth of our DAP customers, which reached \$80.3 million, an increase of 92% versus Q4 2020. In 2022 we will continue to invest behind our growth engines: DAP customer growth, Federal, partner, and international expansion."

*The section titled "Non-GAAP Financial Measures and Key Performance Indicators" below contains a description of the non-GAAP financial measures discussed in this press release and reconciliations between historical GAAP and non-GAAP information are contained in the tables below. The Company is unable to provide a reconciliation of non-GAAP Operating Income (Loss) to Operating Income (Loss), its most directly comparable GAAP financial measure, on a forward-looking basis without unreasonable effort, because items that impact this GAAP financial measure are not within the Company's control and/or cannot be reasonably predicted. These items may include, but are not limited to, predicting forward-looking share-based compensation. Such information may have a significant, and potentially unpredictable, impact on the Company's future financial results.

Throughout this press release, we provide a number of key performance indicators used by our management and often used by competitors in our industry. These and other key performance indicators are discussed in more detail in the section entitled "Non-GAAP Financial Measures and Key Performance Indicators" in this press release.

Non-GAAP Financial Measures and Key Performance Indicators:

In addition to our financial results reported in accordance with GAAP, this press release and the accompanying tables and related presentation materials may contain one or more of the following non-GAAP financial measures: Non-GAAP Gross Profit, Non-GAAP Gross Margin, Non-GAAP Operating Income (Loss), Non-GAAP Operating Margin, Non-GAAP Net Income (Loss) attributable to WalkMe Ltd., Non-GAAP Net Income (Loss) per share attributable to WalkMe Ltd. and Free Cash Flow, all of which are non-GAAP financial measures. We believe that these measures provide useful information about operating results, enhance the overall understanding of past financial performance and future prospects, and allow for greater transparency with respect to key metrics used by management in its financial and operational decision making. Non-GAAP financial measures have limitations as analytical tools and may differ from similarly titled measures presented by other companies. The presentation of this financial information is not intended to be considered as a substitute for the financial information prepared and presented in accordance with GAAP. Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures and not rely on any single financial measure to evaluate our business.

Non-GAAP Gross Profit and Non-GAAP Gross Margin. We define Non-GAAP Gross Profit as gross profit excluding share-based compensation and amortization of acquired intangibles. We exclude these items because they occur for reasons that may be unrelated to our core operating performance during the period, and because we believe that such items may obscure underlying business trends and make comparisons of long-term performance difficult. We use Non-GAAP Gross Profit with traditional GAAP measures to evaluate our financial performance. Non-GAAP Gross Margin is calculated as a percentage of revenues.

Non-GAAP Operating Income (Loss) and Non-GAAP Operating Margin. We define Non-GAAP Operating Income (Loss) as income (loss) from operations excluding share-based compensation and amortization of acquired intangibles. We exclude these items because they occur for reasons that may be unrelated to our core operating performance during the period, and because we believe that such items may obscure underlying business trends and make comparisons of long-term performance difficult. We use Non-GAAP Operating Income (Loss) with traditional GAAP measures to evaluate our financial performance. Non-GAAP Operating Margin is calculated as a percentage of revenues.

Non-GAAP Net Income (Loss) attributable to WalkMe Ltd. We define Non-GAAP Net Income (Loss) attributable to WalkMe Ltd. as Net Income (Loss) attributable to WalkMe Ltd. excluding share-based compensation and amortization of acquired intangibles. We exclude these items because they occur for reasons that may be unrelated to our core operating performance during the period, and because we believe that such items may obscure underlying business trends and make comparisons of long-term performance difficult. We use Non-GAAP Net Income (Loss) attributable to WalkMe Ltd. with traditional GAAP measures to evaluate our financial performance. Non-GAAP Net Income (Loss) per Share attributable to WalkMe Ltd. is calculated based on ordinary shares outstanding after accounting for the exchange of our outstanding convertible preferred shares into ordinary shares as though such event had occurred at the beginning of the periods.

Free Cash Flow. We define Free Cash Flow as net cash provided by (used in) operating activities, less cash used for purchases of property and equipment and capitalized internal-use software costs. We believe that Free Cash Flow is a useful indicator of liquidity that provides information to management and investors, even if negative, about the amount of cash used in our business. Our Free Cash Flow may vary from period to period and be impacted as we continue to invest for growth in our business.

For more information on the non-GAAP financial measures, please see the reconciliation tables provided below. The accompanying reconciliation tables have more details on the GAAP financial measures that are most directly comparable to non-GAAP financial measures and the related reconciliations between these financial measures.

ARR. We define ARR as the annualized value of customer subscription contracts as of the measurement date, assuming any contract that expires during the next 12 months is renewed on its existing terms (including contracts for which we are negotiating a renewal). Our calculation of ARR is not adjusted for the impact of any known or projected future events (such as customer cancellations, upgrades or downgrades, or price increases or decreases) that may cause any such contract not to be renewed on its existing terms. In addition, the amount of actual revenue that we recognize over any 12-month period is likely to differ from ARR at the beginning of that period, sometimes significantly. This may occur due to new bookings, cancellations, upgrades, downgrades or other changes in pending renewals, as well as the effects of professional services revenue and acquisitions or divestitures. As a result, ARR should be viewed independently of, and not as a substitute for or forecast of, revenue and deferred revenue. Our calculation of ARR may differ from similarly titled metrics presented by other companies.

Enterprise-Wide DAP Customers: We define enterprise-wide DAP Customers as those who have purchased enterprise-wide subscriptions or who have department-wide usage of our Digital Adoption Platform across four or more applications.
